Elite MPX™
Aesthetic Workstation

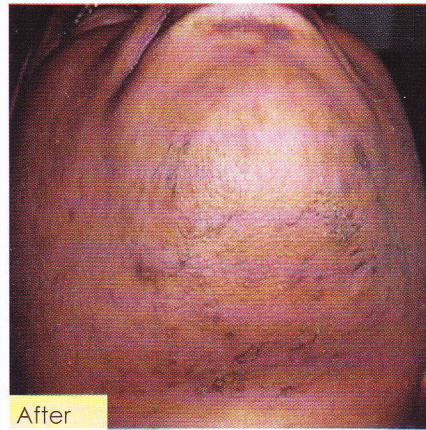

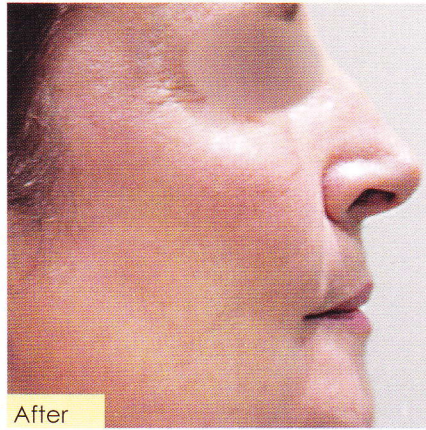

The Elite MPX removes all obstacles.

Before, your patients had to fit your laser. But with more technologies and applications in a single workstation, you can treat all blends of skin types more effectively than ever. In this changing world of ours, that's a critical advantage.

Only Elite MPX has our patented MultiPlex™ sequencing technology—two wavelengths blended for the best possible results. Remove hair, veins, pigmented lesions and all that stands between you and a greater ROI.
