mccosmetics

presentation

DESCRIPTION

Our company is specialized in manufacturing and exporting cosmetic products developed for the health, beauty and wellness sector.

Our main goal is to satisfy customer needs offering effective solutions, both for facial and body treatments, as well as using the best selection of active ingredients.

All mccosmetics products are created due to the expertise and research of competent professionals with years of experience.

Our aim is to achieve long-term customer loyalty, based on mutual benefits.

**WE PROMISE TO SHAKE
THE WORLD OF BEAUTY**

glycolic acid vit. e + f

radiant solution

DESCRIPTION

The ingredients stimulate collagen and elastin production promoting skin renewal, helping to reduce spots and hyperpigmentation, fine lines, wrinkles, scars and other signs of aging. The solution removes dead cells, increasing cell renewal as well as providing a radiant, rejuvenated skin. Vitamins E and F help protect the skin from the external aggressions and reduce small wrinkles by boosting elasticity and hydration. It also protects the skin from the effect of the glycolic acid.

RECOMMENDED FOR:

Acne, Aging Skin, Hyperpigmentation, Spots.

ACTIVE INGREDIENTS:

Glycolic Acid, Vitamin E, Vitamin F.

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

antiaging flash

antiaging solution

DESCRIPTION

The Anti-aging Flash ampoules are indicated for expression wrinkles and facial lines. Its ingredients with reaffirming and renewal properties reduce small facial wrinkles and improve skin smoothness and luminosity. This solution maintains a well moisturized skin and achieves an immediate tensor effect.

RECOMMENDED FOR:

Aging skin

ACTIVE INGREDIENTS:

Elastin, Collagen, Vitamin C, Vitamin F

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

argan oil

antiaging solution

DESCRIPTION

The ampoules contain Argan Oil which nourishes, moisturizes and rejuvenates the skin, providing greater luminosity. It has a powerful anti-aging effect and prevents wrinkles naturally. It also provides hydration and elasticity and stimulates cellular oxygenation.

RECOMMENDED FOR:

Aging Skin

ACTIVE INGREDIENT

Argan Oil

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy , continuous galvanic current, derma roller, etc.

PRESENTATION:

1 ml x 10 ampoules

musk rose oil

regenerating solution

DESCRIPTION

The Musk Rose Oil ingredients due to their regenerating and moisturizing properties are especially indicated for tissue regeneration, reduction of scars and stretch marks, expression lines and premature aging. Not recommended for acneic skins.

RECOMMENDED FOR:

Aging skin, Hydration, Regeneration

ACTIVE INGREDIENTS:

Rosa Moschata Seed Oil

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

1 ml x 10 ampoules

proteoglycans

moisturizing solution

DESCRIPTION

The Proteoglycans ampoules contain ingredients with moisturizing and reaffirming properties that help reduce wrinkles and retard aging signs. The skin becomes smooth and radiant. This solution helps recover and maintain skin elasticity and firmness. It is indicated in the treatment of facial wrinkles, peeling processes, dehydrated skin, flaccidity and in all signs of skin photo aging.

RECOMMENDED FOR:

Aging Skin, Hydration

ACTIVE INGREDIENTS:

Proteoglycans

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

vitamin c

revitalizing & antioxidant solution

DESCRIPTION

The ingredients of the Vitamin C ampoules are a revitalizing and antioxidant solution that neutralizes the free radicals, inhibits melanin production, increases collagen synthesis and skin elasticity. This solution is indicated to treat and prevent photo-aging, skin irregularities and reduces wrinkles providing a younger and radiant looking skin.

RECOMMENDED FOR:

Wrinkles, Skin Aging, Hyperpigmentation, Spots

ACTIVE INGREDIENTS:

Vitamin C

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

vit a

retinol solution

DESCRIPTION

The Vit A ampoules contain ingredients with properties that promote skin moisturizing and elasticity, work as a dermal antioxidant destroying the free radicals that cause damage to the tissues and cells. This solution increases collagen production, smooths out wrinkles gradually and reduces photo-induced damages. It increases cell renewal and collagen synthesis providing a rejuvenated look. It helps reduce stretch marks and enhances the natural skin healing process.

RECOMMENDED FOR:

Acne, Aging, Stretch Marks

ACTIVE INGREDIENTS:

Retinyl Palmitate

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

artichoke extract

anti-cellulite solution

DESCRIPTION

The ingredients exert a diuretic and detoxifying action and are used to treat cellulite and localized fat. This extract helps stimulate the lymphatic drainage system.

RECOMMENDED FOR:

Adipocytes, Cellulite

ACTIVE INGREDIENTS:

Artichoke extract

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

asian centella

cell activation solution

DESCRIPTION

The ingredients of the Asian Centella ampoules improve the blood circulation (especially in areas affected by cellulite), strengthen the skin and stimulate the conjunctive tissue. It is indicated for cellulite, skin rejuvenation, hair loss and stretch marks.

RECOMMENDED FOR:

Hair, Cellulite, Wrinkles, Stretch marks

ACTIVE INGREDIENTS:

Asian Centella Extract

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

biotin hidrixin

regenerative solution

DESCRIPTION

Biotin contains ingredients that help stimulate cell repair, resulting in an overall improvement of the skin structure and appearance. The acceleration of the lipid synthesis strengthens the skin's natural barrier providing a significant wrinkle-reducing power. It has a regulatory effect on the sebaceous secretion, relieves symptoms of seborrheic dermatitis, eczemas and dry skin and also helps prevent hair loss.

RECOMMENDED FOR:

Hair, Skin Aging, Stretch Marks

ACTIVE INGREDIENTS:

Biotin

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

caffeine

reducing solution

DESCRIPTION

The ingredients of the Caffeine ampoules accelerate the blood circulation and stimulate the release of fat storage in the adipocytes to be burned by the body's metabolism. With toning properties, this solution helps reduce the appearance of cellulite and causes localized weight loss.

RECOMMENDED FOR:

Cellulite, Adipocytes

ACTIVE INGREDIENTS :

Caffeine

HOW TO USE:

Apply appropriate amount twice a day, morning and night.

PRESENTATION:

1 ml x 10 ampoules

cellestabyl

lipolytic solution

DESCRIPTION

The ingredients of the Cellestabyl ampoules help dissolve fats difficult to eliminate, providing a powerful and effective aid in the treatment of cellulite and localized fat.

RECOMMENDED FOR:

Cellulite, Adipocytes

ACTIVE INGREDIENTS :

Pyridoxine, Niacin

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

chondroitin mesoplus

reducing solution

DESCRIPTION

The Chondroitin Mesoplus ampoules are indicated for body and facial flaccidity and skin aging. The ingredients of this solution are an excellent aid in tissue renewal processes due to its effect on collagen fibre organization.

RECOMMENDED FOR:

Flaccidity, Skin Aging

ACTIVE INGREDIENTS:

Proteo chondroitin Sulphate

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

collagen pyruvate

stimulating solution

DESCRIPTION

The ingredients of Collagen Pyruvate ampoules, with regenerating properties, stimulate collagen synthesis and fibroblast activity. This solution is indicated for anti-aging treatments, stretch marks, hair loss and flaccidity. At the same time, it accelerates Lipolysis and is very effective in anti-cellulite cocktails. It improves skin elasticity and hydration.

RECOMMENDED FOR:

Cellulite, Skin Aging, Stretch Marks, Hair Loss, Flaccidity

ACTIVE INGREDIENTS:

Pyruvic Acid

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

dexpanthenol

reducing solution

DESCRIPTION

The ingredients of the Dexpanthenol ampoules have a moisturizing effect, boosting the moisture levels in the stratum corneum, reducing the transepidermal water loss and maintaining the skin's natural smoothness and elasticity. This solution accelerates cell renewal, rebuilds damaged tissues and promotes the normal keratinisation of skin and hair.

RECOMMENDED FOR:

Hair Growth, Regeneration, Stretch Marks

ACTIVE INGREDIENTS:

Dexphantenol

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

dmae 3%

firming solution

DESCRIPTION

The DMAE ampoules contain ingredients that improve the appearance of flaccid skin. With a reaffirming and toning action, DMAE provides a facial or body lifting effect. It also hydrates the skin, protecting it against the free radicals. It stimulates collagen and elastin production and is indicated to prevent skin aging and flaccidity.

RECOMMENDED FOR:

Flaccidity

ACTIVE INGREDIENTS:

Dimethylaminoethanol bitartrate

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

ginkgo biloba

anti-cellulite solution

DESCRIPTION

The ingredients of the Ginkgo Biloba ampoules improve the blood circulation, increasing the micro capillaries and reinforcing the blood vessel walls. This double action helps stimulate localized lipolysis and treat cellulite. Ginkgo Biloba is beneficial for anti-aging and hair loss treatments and helps reduce dark circles under your eyes.

RECOMMENDED FOR:

Skin Aging, Hair Loss, Cellulite

ACTIVE INGREDIENTS:

Ginkgo Biloba

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

L-Carnitine

fat carrier solution

DESCRIPTION

L-Carnitine ampoules contain ingredients that are crucial for metabolizing fat and especially indicated as an aid to prevent cellulite and promote weight control. They help burn and eliminate fat and also tone muscle mass.

RECOMMENDED FOR:

Cellulite, Adipocytes

ACTIVE INGREDIENTS

L-Carnitine

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

melilotus

toning solution

DESCRIPTION

The ingredients of the Melilotus Ampoules help reduce the fragility and permeability of the blood vessels through vasoconstriction. This prevents destruction of Vitamin C in the body due to oxidation and loss of collagen. It improves the local blood flow and is an excellent aid to fight cellulite, promoting the elimination of fatty acids and water retention.

RECOMMENDED FOR:

Cellulite

ACTIVE INGREDIENTS :

Melilotus, Rutin, Coumarin

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

oligoelements

balancing solution

DESCRIPTION

The oligoelements are essential for the healthy functioning of the skin and contain crucial properties to maintain a young look. The oligoelement ampoules contain ingredients that regulate and rebalance the skin condition, help break down the chemical connection that links the fat cells, combat the free radicals and flaccidity. They are used as an aid in the treatment of cellulite, localized fat, flaccidity, skin aging and damage.

RECOMMENDED FOR:

Skin Aging, Acne

ACTIVE INGREDIENTS:

Cobalt Gluconate, Zinc Gluconate, Nickel Gluconate

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

organic silicon

drainage and regenerating solution

DESCRIPTION

The Organic Silicon ampoules contain ingredients that have a smoothing and toning effect, retarding the skin aging process. This solution restores strength, flexibility and elasticity to the collagen and elastin of the connective tissues. It moisturizes and renews the cells providing firmness and tonicity. It is indicated to help prevent skin aging, cellulite and flaccidity. It provides excellent regenerating properties.

RECOMMENDED FOR:

Cellulite, Skin Aging, Stretch Marks

ACTIVE INGREDIENTS:

Methylsilanol Mannuronate

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

phosphatidylcholine

lipolytic solution

DESCRIPTION

Phosphatidylcholine is indicated in the treatment of weight loss and localized fat deposits. The ingredients of the phosphatidylcholine ampoules dissolve the stored fat in the adipocytes and reshape body contour.

RECOMMENDED FOR:

Cellulite, Adipocyte

ACTIVE INGREDIENTS:

Phosphatidylcholine

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

serum solution

anti-cellulite solution

DESCRIPTION

The ingredients of the Serum Solution are excellent to help in the treatment of cellulite and localized fat, helping to break down fat cells and to eliminate water retention.

RECOMMENDED FOR:

Cellulite

ACTIVE INGREDIENTS:

Sodium Chloride

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

venolaureth

sclerosing solution

DESCRIPTION

The Venolaureth ampoules contain ingredients that help capture water through the stratum corneum, helping to hydrate the lipid mantle and epidermis. It causes vein occlusion, reducing the varicose veins look. It is an excellent aid in the treatment of sclerosis, vascular spiders and couperosis.

RECOMMENDED FOR:

Sclerosis, Vascular Spiders, Couperosis

ACTIVE INGREDIENTS:

Laureth

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, vacotherapy/VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

2 ml x 10 ampoules

adn

antiaging solution

DESCRIPTION

Its active ingredient with an excellent antioxidant and moisturizing effect protects the cell membranes from oxidative degradation. It promotes dead cell renovation and restores connective tissue, stimulating the healing processes. It prevents damaged collagen caused by exposure to sun radiation, oxidative stress and tobacco. It is used in anti-aging treatments to fight photo-aging, enhance a smoker's skin and improves a variety of conditions such as dry skin, wrinkles, stretch marks and hair loss.

RECOMMENDED FOR:

Hair Loss, Wrinkles, Stretch Marks

ACTIVE INGREDIENTS

Sodium DNA

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 5 Vials

5ml x 10 Ampoules

glutathione

whitening solution

DESCRIPTION

The ingredients of Glutathione ampoules provide essential detoxifying properties that inhibit melanin depigmentation as well as prevent the damage caused by external factors.

RECOMMENDED FOR:

Whitening, Skin Aging.

ACTIVE INGREDIENTS:

Glutathione

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

organic silicon dmae

firming solution

DESCRIPTION

The ingredients of Organic Silicon & DMAE ampoules provide properties to combat sagging, cellulite and skin aging, improving skin elasticity and firmness.

RECOMMENDED FOR:

Skin Aging, Firming, Regeneration.

ACTIVE INGREDIENTS:

Organic Silicon, DMAE.

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 10 ampoules

hyaluronic acid

moisturizing and antiaging solution

DESCRIPTION

Hyaluronic Acid is especially indicated for very dry and dehydrated skins, treatment of wrinkles and expression lines. The active ingredient of the hyaluronic acid, due to its effect in maintaining the water molecules in the tissue, restores skin hydration, prevents transepidermal water loss and contributes to wrinkle filling by restoring collagen levels.

RECOMMENDED FOR:

Moisturizing, Wrinkles, Skin Aging

ACTIVE INGREDIENTS:

Hyaluronic Acid

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 5 Vials

hyaluronidase

cellulite solution

DESCRIPTION

Hyaluronidase contains ingredients that act as diffuser agents in the elimination of water retention and adipocytes. It increases the permeability of connective tissue and absorption of fluids.

RECOMMENDED FOR:

Cellulite

ACTIVE INGREDIENTS:

Hyaluronidase

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 5 Vials

cocktails

antiaging

DESCRIPTION

The Anti-aging ampoules combine active ingredients that stimulate collagen synthesis, reduce wrinkles, moisturize, reaffirm the skin and regenerate tissues. With antioxidant properties, they inhibit and reduce facial contractions, preventing the appearance of new expression lines and wrinkles.

RECOMMENDED FOR:

Expression Lines, Eye Contour, Skin Laxity, Fine Lines and Wrinkles

ACTIVE INGREDIENTS:

Dexpanthenol, DMAE, Organic Silicon, Asian Centella and Hyaluronic Acid.

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 5 Vials

cocktails

whitening

DESCRIPTION

The whitening ampoules are indicated to treat pigmentation and clear the skin. The active ingredients reduce the production of melanin and produce a soft exfoliation in the superficial layers of the skin to eliminate the pigmented cells. They stimulate cell renewal, neutralize the free radicals, improve skin smoothness and reduce the appearance of spots, giving the skin a brighter, glowing look.

RECOMMENDED FOR:

Hyperpigmentation

ACTIVE INGREDIENTS:

Gatuline Whitening and Transcutol.

HOW TO USE:

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION:

5 ml x 5 Vials

cocktails

hair

DESCRIPTION

The Hair ampoules result from a combination of amino acids, vitamins and minerals. The active ingredients improve significantly the hair structure, regulate the sebum production, stimulate hair growth and reduce loss. They prevent the recurrence of dandruff, preserving the hair scalp. They restore micro-circulation of the scalp and revitalize the hair follicles.

RECOMMENDED FOR

Hair loss

ACTIVE INGREDIENTS

Trichogen, Sebaryl, Ginseng, Arginine, Horse Chestnut Extract, Panthenol and Biotin.

HOW TO USE

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION

5 ml x 5 Vials

cocktails

cellulite

DESCRIPTION

The Cellulite ampoules combine active ingredients that reduce cellulite, improve skin firmness and blood flow. At the same time, they stimulate collagen synthesis increasing skin flexibility. Containing stimulating, draining and reaffirming properties, they reduce cellulite and the orange peel look as well as improve blood circulation. They eliminate water retention, contributing to volume reduction.

RECOMMENDED FOR

Back, Stomach, Hips, Buttocks, Thighs

ACTIVE INGREDIENTS

L-carnitine, Phosphatidylcholine, Sodium Deoxycholate, Troxerutin, Taurine and Zinc.

HOW TO USE

Electroporation, iontophoresis, ultrasound, thermotherapy, VAC Therapy, continuous galvanic current, derma roller, etc.

PRESENTATION

5 ml x 5 Vials

cleansing milk

DESCRIPTION

It cleanses the skin effectively, removing all traces of makeup and impurities while respecting its natural balance. Its ingredients with a protective, regenerating and moisturizing action provide smoothness, firmness and radiance to the skin.

RECOMMENDED FOR

It is recommended for all kinds of skins. It provides the basic steps for a deep cleansing of the skin and its use is essential before the Facial Toner.

ACTIVE INGREDIENTS

Chamomile
Glycerine

PRESENTATION

200ml

facial

toner

DESCRIPTION

It is ideal to complete the facial daily cleansing. Its ingredients tone, release, sooth and hydrate the skin, minimizing pore size. With antioxidant and renewal properties, its ingredients remove any remaining traces of makeup, skin impurities and oil excess. It leaves the skin fresh and toned, with a refined texture.

RECOMMENDED FOR

It is recommended to complement your daily cleansing. Its use is obligatory in post-peeling.

ACTIVE INGREDIENTS

Asian Centella
Glycerin
Allantoin

PRESENTATION

200ml

moisturizing

cream

DESCRIPTION

A hydro-nutritive cream for face, neck and neckline containing ingredients that promote skin softness and elasticity, restoring the hydrolipidic mantle and neutralizing the free radicals responsible for premature aging. It also provides the required hydration and nutrition to maintain the skin healthy preventing premature oxidation. Moisturizing cream gives a pleasant sensation of freshness and well-being.

RECOMMENDED FOR

It is recommended for skin hydration and nutrition. It restores the hydrolipid mantle, vital to maintain the appropriate skin hydration level and ensure protection against external aggressions such as the sun and wind.

ACTIVE INGREDIENTS

Hidrovitón
Vitamin E
Amniotic fluid

PRESENTATION

50ml

total sun block

50+

DESCRIPTION

The ingredients of Sun Block 50+ contain protective and moisturizing properties that guarantee physical protection against external factors, helping to recover skin tissue. It is recommended for use in post-peelings, post-surgical interventions and post-laser treatments.

RECOMMENDED FOR

Suitable for all kinds of skins, it hydrates and prevents photo aging and the appearance of spots. It protects the skin after any medical and/or cosmetic interventions.

ACTIVE INGREDIENTS

Wax 2503
Parsol MCX
Amniotic Fluid
Vitamin E
Mimosa Tenuiflora Bark Extract
Vitamin F

PRESENTATION

50ml

total sun block

50+ color

DESCRIPTION

The ingredients of Sun Block 50+ contain protective and moisturizing properties that guarantee physical protection against external factors, helping to recover skin tissue. It is recommended for use in post peelings, post-surgical interventions and post-laser treatments. Sun Block 50+ Color substitutes makeup.

RECOMMENDED FOR

Suitable for all kinds of skins, it hydrates and prevents photo-aging and the appearance of spots. It protects the skin after any medical and/or cosmetic interventions.

ACTIVE INGREDIENTS

Wax 2503
Parsol MCX
Amniotic Fluid
Vitamin E
Mimosa Tenuiflora Bark Extract
Vitamin F

PRESENTATION

50ml

facial

renew

DESCRIPTION

The ingredients of the Facial Renew help regenerate, hydrate reaffirm and smooth irritated or damaged skin caused by external agents.

RECOMMENDED FOR

Skin regeneration and revitalization; anti-wrinkles; promoting skin elasticity and cellular respiration;

ACTIVE INGREDIENTS

Aloe Vera
Mimosa Tenuiflora Bark Extract
Allantoin
Vegetable Placenta
Elastin

PRESENTATION

50ml

antiaging

cream

DESCRIPTION

This cream contains ingredients with anti-aging, regenerating, antioxidant, moisturizing and nutritive properties. It prevents and repairs the effects of time on the skin, smoothing wrinkles and expression lines. It boosts the skin giving it a firm and glowing look.

RECOMMENDED FOR

Treatment and prevention of the skin aging. Dermatosis associated to skin dehydration. Correction, prevention and elimination of premature expression wrinkles. Provides excellent skin tolerance. Ideal for a softened, hydrated skin, with a younger look.

ACTIVE INGREDIENTS

Proteoglycans
Avocado Oil
Allantoin
Repair Complex

PRESENTATION

50ml

coffee

cream

DESCRIPTION

A remodelling cream containing active ingredients that reduce fat and adipocytes. It also improves drainage of excess fluid and eliminates water retention.

RECOMMENDED FOR

Indicated for fat and cellulite. The active component of Caffeine Cream provides lipolytic and anti-cellulite properties. Promotes metabolism of fats deposited in adipose tissue, preserving and improving skin elasticity.

ACTIVE INGREDIENTS

Hyaluronidase
Caffeine
Asian Centella
Fucus Vesiculosus

PRESENTATION

200ml

ppc

cream

DESCRIPTION

It contains ingredients that help eliminate localized fat, and at the same time stimulate blood circulation and cell metabolism, improving the elimination of toxins.

RECOMMENDED FOR

Cream indicated for reducing and remodelling treatments. The active component of Phosphatidylcholine Cream provides reducing, lipolytic and firming properties. Due to its characteristics, phosphatidylcholine it also stimulates the degradation, mobilization and elimination of fats.

ACTIVE INGREDIENTS

Caffeine
Phosphatidylcholine
L-Carnitine
Fucus Vesiculosus

PRESENTATION

200ml

firming

cream

DESCRIPTION

The properties of the active ingredients have a reparative and moisturizing action, boosting collagen and elastin production and increasing skin firmness. This cream leaves your skin with a silky, refined texture.

RECOMMENDED FOR

Cream indicated to combat deep cellulite and localized fat; Water retention reduction.

ACTIVE INGREDIENTS

Collagen
Elastin
Aloe Vera
Boragy

PRESENTATION

200ml

melanopeel

whitening solution

melanoPEEL

whitening treatment

EFFECTIVE AND SAFE SOLUTION TO REDUCE AND ELIMINATE PIGMENTATION OF MELANIC ORIGIN

melanoPEEL is a topical depigmentation treatment to reduce and eliminate skin blemishes in the epidermis of melanic origin.

The active ingredients of melanoPEEL help block melanin production and reduce spots of melanic origin in the epidermis, clearing and rejuvenating the skin. At the same time, it prevents skin aging, increases exfoliation of dead cells and stimulates collagen production.

In order to achieve maximum efficacy, it synergistically combines different whitening agents that inhibit the melanogenesis process in different stages, blocking the production of melanin.

It also has exfoliating agents that accelerate the cell renewal process and produce epidermal desquamation, eliminating the melanin found in the keratinocytes and lightening the skin tone.

The combination of depigmenting active agents with antioxidants and anti-free radicals clears and rejuvenates the skin, at the same time as it stimulates the production of collagen.

The addition of solar filters guarantees long-lasting results, preventing the reappearance of blemishes.

melanoPEEL treatment guarantees the elimination and reduction of all types of melanic blemishes in an easy, safe and effective way.

melanoPEEL

treatment steps

Step 1 - Degreasing Solution

Cleansing solution to remove all skin impurities, opening the cutaneous barrier.
Presentation: 10ml

Step 2 - Pre-treatment Solution

Pre-peeling contains active ingredients that exert a whitening and exfoliating effect on the skin surface, preparing it to receive all the benefits of the melanoPEEL mask.
Presentation: 10ml

Step 3 - melanoPEEL mask

The active ingredients of melanoPEEL help block melanin production and reduce spots of melanic origin in the epidermis, clearing and rejuvenating the skin. At the same time, it prevents skin aging, increases exfoliation of dead cells and stimulates collagen production.
Presentation: 15ml

Step 4 - melanoPEEL Cream

The active ingredients of melanoPEEL Cream contribute to the reduction of cutaneous spots and perform a triple action: as an antioxidant and a protective and skin whitening agent.
Presentation: 30ml

Step 5 - Moisturizing Cream

The Moisturizing Cream is a hydro-nutritive cream for face, neck and neckline that restores the hydrolipid mantle, neutralizes the free radicals responsible for premature aging and prevents premature oxidation.
Presentation: 50ml

Step 6 - Total Sun Block 50+

The ingredients of Total Sun Block 50+ contain protective and moisturizing properties that guarantee physical protection against external factors, helping to recover cutaneous tissue. It is recommended for use in post-peelings, post-surgical interventions and post-laser treatments.
Presentation: 50ml

melanoPEEL

results

Reduction of blemishes appears as from the first week of treatment. Visible results are noticeable one month after treatment and are successful in 97% of the cases.

peelings

sali_cylic

DESCRIPTION

Salicylic, a beta hydroxyl acid, is the most used keratolytic agent which enhances the epidermis and renews the skin. It improves the look of pro-acneic skins, clears spots, revitalizes and gives a glow to aged skins.

ACTIVE INGREDIENTS:

Salicylic Acid

PRESENTATION:

30 ml

peelings

glycolic 30%

DESCRIPTION

It is indicated for expression wrinkles, photo-aging, cutaneous spots, acne and scars. The active ingredients of the glycolic acid remove the dead cells from the skin surface, stimulating cellular renewal. It leaves the skin with a young, smooth and uniform appearance.

RECOMMENDED FOR:

Aging Skin
Blemishes
Skin Renewal and Smoothness

ACTIVE INGREDIENTS:

Glycolic Acid

PRESENTATION:

Glycolic Acid - 30 ml
Post-peeling - 50ml

peelings

lactic 45%

DESCRIPTION

It is indicated for dry skins, skin flaccidity and whitening, skin lacking luminosity, photo-aging and wrinkles, The active ingredients of the lactic acid have a moisturizing effect on the skin, attracting the water molecules in the skin to the surface and stimulating ceramide synthesis.

RECOMMENDED FOR:

Skin Dryness
Photo-aging
Wrinkles
SkinLightening
Skin Flaccidity
Poor Facial Luminosity

ACTIVE INGREDIENTS:

Lactic Acid

PRESENTATION:

Lactic Acid - 30 ml
Post-peeling - 50ml

peelings

mandelic 45%

DESCRIPTION

It is suitable for aging skin, wrinkles and spots. The active ingredients of the mandelic acid break down the intracellular links, stimulate collagen synthesis and cell regeneration. It has a bacteriostatic effect that regulates blemished, oily and acneic skins. It inhibits the synthesis of melanin and helps renew skins damaged by sun exposure. The mandelic acid is suitable for sensitive and dark skins.

RECOMMENDED FOR:

Aging Skin
Wrinkles
Blemishes
Hyperpigmentation

ACTIVE INGREDIENTS:

Mandelic Acid

PRESENTATION:

Mandelic Acid - 30 ml
Post-peeling - 50ml

peelings

salicylic 20%

DESCRIPTION

It is indicated for oily skins, prone to acne, blocked follicles and reduction of wrinkles. The active ingredients of the salicylic acid improve the look of blemished and aged skins. With exfoliating, anti-inflammatory, anti-acne and anti-aging properties, it accelerates the removal of dead cells and renews the skin, resulting in visible skin rejuvenation.

RECOMMENDED FOR:

Acne-prone skins
Very Oily Skins
Blocked Follicles

ACTIVE INGREDIENTS:

Salicylic Acid

PRESENTATION:

Salicylic Acid - 30 ml
Post-peeling - 50ml

peelings

jessner 10%

DESCRIPTION

It is indicated for scars, skin aging, hyperpigmentation, stretch marks, hands and neck line. Jessner contains active ingredients with antioxidant, purifying, whitening and renewing properties which help reduce sebum production and open clogged sebaceous follicles. They also promote the acne healing process and renew aged and sun damaged skin. The result is a smoother and rejuvenated skin.

RECOMMENDED FOR:

Aging skin
Neckline
Hands
Hyperpigmentation
Stretch marks

ACTIVE INGREDIENTS:

Resorcinol

Jessner Acid - 30 ml
Post-peeling - 50ml

peelings

azelaic acid 25%

DESCRIPTION

Developed for the treatment of acne and cutaneous hyperpigmentation, the active principles of Azelaic Acid contain bacteriostatic properties and exhibit an inhibitory effect on tyrosinase production, reducing melanin synthesis.

RECOMMENDED FOR:

Acne
Hyperpigmentation

ACTIVE INGREDIENTS:

Azelaic Acid

PRESENTATION:

Azelaic Acid - 30 ml
Post-peeling - 50ml

peelings

magic champagne

MAGIC CHAMPAGNE:

Magic Champagne contains active ingredients which provide an intensive, anti-aging treatment with an immediate effect. They stimulate the organism defense mechanisms to combat effectively the factors that accelerate skin aging.

At the same time, it provides exfoliating properties that provide deep skin cleansing, removing any dead cells and closed pores. It reduces dramatically the appearance of redness, sun spots and acne marks.

During the treatment sessions the skin becomes visibly younger, smooth and uniform. Wrinkles and fine lines fade, reducing skin imperfections. The result is a rejuvenated, glowing skin.

PRESENTATION:

Humidify spray - 50ml

5 Champagne mask - 6ml

5 Prof Vit C - 5ml

5 Serum Solution - 5ml

derma roller

collagen induction

DESCRIPTION

Derma Roller is device which induces the body into producing collagen, improving the diffusion of the active principles. The micro-needles create micro channels allowing the active ingredients to penetrate from the surface into the dermal tissue. It promotes the production of new collagen. It also provides a more effective penetration of the active ingredients (200 times more) in the stratum corneum.

THERAPIES

Transdermal transport of active principles.
Creation of new layers of collagen.
Reduction of pigmentation problems.
Reduction of acne scars.
Reduction of pore size.

RESULTS

- a) A significant improvement in wrinkle and skin texture;
- b) The skin acquires a much healthier and younger look;
- c) The scars reduce drastically;
- d) The pigmented spots reduce significantly and may even disappear;

SIZES

- 0,2 mm
- 0,5 mm
- 1,0 mm
- 1,5 mm
- 2,0 mm

hydrogel

mask bx

DESCRIPTION

The Hydrogel Mask refreshes and immediately relieves the skin, followed by a tensor effect. It hydrates and softens the skin and also promotes a facelift.

PROPERTIES

Collagen helps produce native collagen that repairs the dermis and increases the water retention capacity, improving appearance in general.

Chestnut Indian Extract (*Aesculus hippocastanum*) protects and enhances the local blood capillaries. Due to its anti-inflammatory action, it reduces blood swelling. It acts as a stimulant and has a tonic effect.

Hyaluronic acid is particularly suitable for very dry and dehydrated skins due to its ability to bind to water and keep it in the tissue. It helps treat wrinkles and expression lines with immediate results.

Ginkgo Biloba helps protect the cells from the free radicals and it has antioxidant properties.

moisturizing

mask

DESCRIPTION

The Moisturising Mask has moisturizing, revitalizing and relaxing properties. It is ideal for the recovery of a tired and dehydrated skin. It is essential after facial peelings.

RECOMMENDED FOR:

It is deeply moisturizing.

It improves the skin, leaving it smooth and soft. It helps reduce the appearance of dry and scaly skins. It is suitable for all types of skin.

PROPERTIES

Glycerin provides the skin with moisturizing, smoothing and emollient properties.

Zinc oxide protects the skin against ultraviolet radiation. It has healing properties, and acts as a sun blocker.

Chamomile has antiseptic properties. It contains alpha bisabolol, providing soothing and calming properties which reduce edemas and Inflammation.

It also contains azulene, an ingredient that has anti-inflammatory, anti-allergic and repairing properties for damaged tissue. It is indicated for the treatment of hypersensitivity.
